About us Welcome to LB Farms :-

01

Cultivating Quality, Diversity, and Sustainability in Every Tomato

At Lumina Bloom, we are revolutionizing modern agriculture through technology-driven farming, sustainability, and global food trading. As a leader in smart farming and Agri-tech solutions, we operate on 15 acres of fully automated land, integrating advanced Israel Technology to maximize productivity and efficiency.

But our success is not just about innovation—it's about collaboration. Through our strategic partnerships with Sunnyside Chicken and Equity Plus, we have expanded our reach to become a powerhouse in poultry farming, organic agriculture, and international food trading. At Lumina Bloom, our greenhouse farming solutions are designed to provide a controlled and efficient environment for crop cultivation. By using advanced climate control systems, we enable year-round farming, protecting crops from extreme weather conditions and pests while optimizing water and nutrient usage. This method significantly enhances productivity, reduces resource wastage, and ensures higher yields, making farming more profitable and sustainable. Our greenhouse technology is ideal for growing a variety of fruits, vegetables, and herbs, ensuring a steady supply of fresh produce regardless of seasonal changes.

What We Offer...

At Lumina Bloom, we act as a bridge between capital and cultivation. Our Agri-Investment & Equity Solutions connect forward-thinking investors with scalable, high-impact opportunities in agriculture — including hydroponic farming, smart poultry systems, greenhouse ventures, and global export chains. We focus on projects that combine profitability with purpose, offering end to-end support — from due diligence and compliance to monitoring ROI and impact.

Tomato Production Unit (TPU)
Start from 01 TP = 4,500/-
(1 TP = 4,500/-)

Cultivation Growth
0.3% / Daily.

TP = Tomato Plant
(1 TP = 4,500/-)
